| IDENTIFIERS | *Washington |

ABSTRACT

In order to reveal trends in community college enrollments in Washington, student demographic and enrollment data for academic year 1977-78 were compiled and compared with figures for previous years. The report provides annualized averages for full-time equivalent (FTE) enrollments for the system for the years 1967 to 1977, and for FTE students by institutional intent (academic, occupational, etc.) for 1967 to 1978. Quarterly enrollments are summarized for the system and by district. Student characteristics focused upon in the study include age, sex, source, ethnic background, veteran and residency status, credit-hour load, enrollment category, and headcount and FTE enrollments by time and location. Study findings for 1977-78 include the following: (1) over 171,000 students were enrolled during Fall quarter 1977, an increase of 540% over 1962; (2) total annualized average FTE's were 89,768--out of this, state-supported annualized average FTE's accounted for 85,666; (3) 75% of all students were 21 or older; (4) increasing female enrollments exceeded male enrollments by nearly 7% (51% vs. 45%); (5) minority students accounted for 9% of total enrollment; (6) non-resident student enrollment increased from 2.71% in 1971 to 3.28% in 1977; (7) the percentage of veterans declined from 14% in 1975 to 7.96% in 1977; (8) part-time students accounted for 62% of enrollments; and (9) 64% of students were not entering from high school or another higher education institution. # FOREWORD

The FACTBOOK ADDENDUM A: STUDENT ENROLLMENTS, displays detailed student enrollment data for Academic Year 1977-78. This is the second edition of Addendum A. The first edition summarized Academic Year 1976-77 enrollments.

Addendum A expands Chapter 2 of the FACTBOOK into greater detail by displaying district information to address trends at individual institutions. The FACTBOOK emphasizes systemwide enrollment patterns. Tables herein are numbered according to the FACTBOOK schema.

The first section of this report concerns enrollments and has been divided into two sub-sections: annualized averages, and detailed quarterly enrollments.

The second section reviews student chacteristics for fall quarters. (Demographic information is collected fall quarters only and applies to academic and occupational students.)

Information for this publication is from two of the Management Information System (MIS) files: the MIS-1 Student Enrollment Report, and the MIS-2 Course Effort Report.

Additional information on the state system of community colleges may be obtained from the State Board for Community College Education, 319 East Seventh Avenue, Mail Stop FF-11, Olympia, WA. (98504); telephone: (206) 753-3673, or SCAN 234-3673.

# INTRODUCTION

This publication reviews student enrollment patterns and the types of students served by the community college system, a unique segment of Washington postsecondary education.

Enrollment data has been taken from the MIS-1 and MIS-2. Demographic information is collected for fall quarters and applies only to academic and occupational students.

The terms "academic", "occupational", and "community service" students used in tables in this chapter are "institutional intent" categories; i.e. the institution's intent for offering courses. Headcount and FTE enrollments are categorized by institutional intent. These categories should not be confused with "student intent" data -- the student's reason for attending college. Student intent information may be found on page 34.

When comparing community college enrollment patterns, it is important to understand the counting methodologies involved. Historical enrollments have been based on an "8th day plus adds" counting methodology in which the number of students enrolled on the 8th instructional day of a quarter were counted and all registrations for the rest of the quarter were added. As a result of discussions with the Legislature, a "rolling 10th day" counting methodology means that courses must be identified as either continuous[1] or sequential[2]. Based on

---

[1]Continuous instruction course sections are of the open entry/open exit type which permit a student to enroll, begin and end instruction at any time.

[2]Sequential instruction course sections are any courses not classified as continuous.

this course type, 10th day enrollments are derived in the following manner:

(1) Enrollments in sequential course sections which begin during the first five days of instruction of a regular quarter are counted on the 10th day of that quarter on a net basis (neither adds nor withdrawals after the 10th day have any effect);

(2) Enrollments in sequential course sections which begin after the 5th instructional day are counted on the 10th quarterly instructional day after the start of a course on a net basis; and,

(3) Enrollments in all other courses such as short courses, seminars and continuous enrollment offerings are counted on a net basis at the end of the quarter in which fees are collected.

The basic difference between the two systems of counting is that the 8th day method captured the net 8th day headcount plus all official registration adds during the remainder of the quarter. The rolling 10th day method does not include any adds that occur after the 10th instructional day in any sequential course.

Since FTE student data is a major component in the budgeting process of the system and historical enrollment is used in budget development, an agreement with the Legislature provided for the collection of enrollment according to the new counting methodology in the 1975-77 biennium to provide a base for the 1977-79 allocations. Thus, a dual reporting system was developed for the 1975-76 and 1976-77 academic years. In 1975-76, enrollments were based on the 8th day counting methodology, and supplemental records identifying the 10th day enrollments were provided. For the 1976-77 academic year, enrollments were based on the 10th day counting methodology with supplemental records identifying the 8th day enrollments. The 1977-78 academic year and all subsequent academic years will be based solely on the 10th day counting methodology.

The enrollment tables on the following pages illustrate both enrollment counting figures for 1975-76 and 1976-77; 1977-78 figures are based on the rolling 10th day method. Demographic data was based exclusively on 8th day enrollments for 1971 through 1975; 1976 and 1977 information was based on 10th day enrollments.

# SUMMARY OF CONCLUSIONS

Washington community colleges enrolled more than 171,000 students during Fall Quarter 1977. In terms of full-time-equivalencies, enrollment was more than 87,000.

In 1977-78 total annualized average FTEs were 89,768. Out of this, state-supported annualized average FTEs accounted for 85,666; the balance--4,102 FTEs--represented contracted and community service efforts.

Currently, 75% of all students indicating their age are 21 years or older; more than half of those are 30 years old or older. The most significant aspect of the age data reported is that the average age of community college students is 29.

Female enrollment now exceeds male enrollment. In 1971, female enrollment accounted for 43% of the student population. In 1977, female enrollment exceeded that of males by nearly 7% (female, 51%; male 45%).

The number of minority students attending community colleges during Fall Quarter 1977 was over 14,000, about 9% of total enrollment.

The number of non-resident students attending Washington community colleges in Fall 1977 was 5,244 (3.28% of total). In 1971, 2,833 non-resident students attended (2.71% of total).

The number of veterans attending is currently 12,680 (7.96% of total). In 1975, veterans accounted for 14% of total (18,705 students). The decline, attributable to new federal restrictions affecting G.I. Bill educational benefits, is considered the greatest single factor affecting community college enrollments during the years 1976 and 1977.

The greatest percentage (64%) of students entering community colleges fall under the category of "all others." Washington residents other than those entering directly from high school or immediately transferring from another Washington institution of higher education are counted in this category (for example, homemakers returning to school; people employed seeking additional training). More than 41,000 students (25.90% of total) returned to the same community college this year.

The number of part-time students rose to 62% of total enrollments Fall Quarter 1977, which reduced the average credit-hour load from 8.5 in 1976 to 8.1 in 1977.

More than 41% of total academic and occupational students attended courses during the day and on-campus. In 1974, nearly 44% attended at the same time and location.

# STUDENT ENROLLMENTS

# SYSTEM SUMMARY OF ANNUALIZED FTE STUDENTS

## WASHINGTON COMMUNITY COLLEGES
## ACADEMIC YEAR 1967-68 THRU 1977-78

Annualized* state-supported FTE enrollments play a key part in the budgeting and planning process for the community college system. The primary workload variable for the community college budget model is the annualized average FTE. The system is held accountable for its performance against the appropriated levels and the districts have FTE allocations as part of their operating budget allocations each year.

The opposite chart displays the growth pattern for academic, occupational and community service annualized FTEs since Academic Year 1967-68.

Table 2A1 on the facing page shows the system annualized averages by fund source since Academic Year 1967-68. Table 2A1.3 on page 5 displays district detail since 1970-71 with annual changes.

*Annualized FTEs are derived by adding the student credit hours for each quarter and dividing by a factor of 45 (1 FTE = 15 cr. hrs. per quarter, times three quarters = 45).

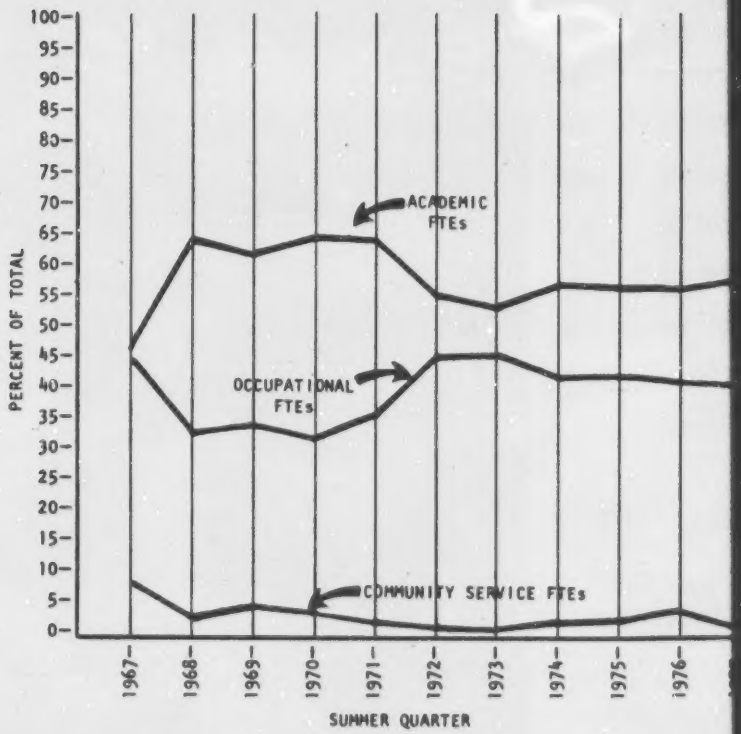
# SUMMER QUARTER STUDENT ENROLLMENTS

## WASHINGTON COMMUNITY COLLEGES
## 1967 THRU 1977

Summer quarters are included in the community college operating appropriations. The annualized FTEs include FTEs generated during all four quarters of an academic year.

The table following displays system FTEs and total enrollment (headcount) by institutional intent since 1967. District detail summaries for Summer Quarter 1977 may be found in the table on page 19.



# SUMMER QUARTER STUDENT ENROLLMENTS

# FALL QUARTER STUDENT ENROLLMENTS

## WASHINGTON COMMUNITY COLLEGES

## 1962 THRU 1977

The focal point for community college data is primarily fall quarter information, typically the term most reflective of college activities throughout an academic year. All student demographic data is collected during fall quarters.

The opposite chart displays the percentage distribution of academic, occupational and community service FTE student enrollments since 1962.

Table 2A3 on the facing page shows FTE and headcount system-wide enrollments by institutional intent (the college's intent for offering courses) since 1962. Table 2A3.1 on page 22 displays district detail for Fall Quarter 1977. In addition, tables 2A3.2 and 2A3.3 display district detail for student headcount and FTE enrollments, respectively, since 1962.

# FALL QUARTER STUDENT HEADCOUNT

## WASHINGTON COMMUNITY COLLEGES
## 1962 THRU 1977

The opposite graph illustrates the rapid growth of community college enrollments. Headcount enrollment has increased by more than 540% since 1962. The sharp increase in 1977 resulted from the surge of women into higher education. The decline in 1976 from 1975 (4,882 students or 3 percent) was due in part to the change in counting enrollments (as discussed in the introduction to this chapter). Also contributing to the decline was a reduction in veteran enrollments attributed to new federal restrictions and an improvement in the job market (community college enrollment tends to decrease when employment increases). The table on the following page displays detailed district headcount enrollments since 1962.

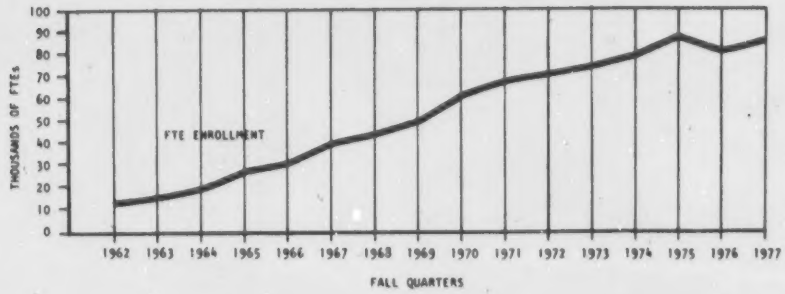
# FULL-TIME-EQUIVALENT STUDENT ENROLLMENTS

WASHINGTON COMMUNITY COLLEGES
FALL QUARTERS 1962 THRU 1977

Another mean for reporting student enrollments is the full-time-equivalency (FTE) measure. FTE student enrollments are derived by adding the total number of credit hours generated by students and dividing by 15 (15 credit hours is considered a typical full-time student load for one quarter).



FTE enrollments have increased by more than 450% since 1962. The only decline in the upward trend occurred in 1976. This decline was due to the change in counting enrollments, the improvement of the job market, and the reduction of veteran enrollments.

Headcount enrollment has grown at a faster rate than FTE enrollment, indicating a growing proportion of part-time students in attendance. The student biographic section of this report discusses historical student credit hour loads and graphically portrays this trend. The opposite chart illustrates the growth rate for headcount and FTE enrollment since 1962.

SOURCE: SBCCE MIS-1 Student Enrollment Reports and MIS-2 Course Effort Reports

NOTE: *Seattle North, Seattle South, and Spokane Falls were established in 1970; however, data was incorporated with Seattle Central and Spokane Community Colleges respectively for that year.
The sum of the detail may not equal the system totals in all instances due to rounding of credit hours. Figures include academic, occupational, and community service students; all funding sources are reflected. Eighth-day plus adds counting methodology, 1962-75; Rolling tenth-day counting methodology, 1976 and 1977.

# WINTER QUARTER STUDENT ENROLLMENTS

WASHINGTON COMMUNITY COLLEGES
1968 THRU 1978

The opposite chart displays the percentage distribution of academic, occupational and community service FTE enrollments during Winter Quarters since 1968.

For the first time in community college history, the 1974 Winter Quarter enrollments exceeded those of Fall Quarter (80,539 FTEs compared to 80,102 FTEs respectively). Winter Quarter 1977 enrollment almost matched Fall Quarter 1976 state-supported FTEs (79,426 FTEs compared to 79,848 FTEs, respectively).

# SPRING QUARTER STUDENT ENROLLMENTS

WASHINGTON COMMUNITY COLLEGES
1968 THRU 1978

The opposite chart displays the percentage distribution of academic, occupational and community service FTE enrollments since 1968. Total FTEs have more than doubled since 1968 (from 33,809 FTEs in 1968 to 77,271 FTEs in 1978, or 129%).

Table 2A5 on the following page displays system totals for FTE students and headcount enrollments since 1968. Table 2A5.1 displays district detail enrollments by fund source for Spring Quarter 1978.

# STUDENT CHARACTERISTICS

# STUDENT DEMOGRAPHIC DATA

## WASHINGTON COMMUNITY COLLEGES
## FALL QUARTERS 1971 THRU 1977

The remainder of this report is devoted to community college student characteristics. Information on the age, sex, ethnic background, residency status, veteran status, credit-hour loads and the sources of students has been provided for academic and occupational students. Tables on the following pages display system totals since 1971 and district detail for fall quarter 1977. Tables showing demographic categories by student intent categories are also included. These tables show, for example, those student intent areas in which veterans are enrolled.

The term "academic and occupational students" used in this section is categorized according to "institutional intent," i.e. the institution's classification of courses in which students are enrolled. Headcount and FTE enrollments are categorized by institutional intent. These categories should not be confused with "student intent" data.

Enrollment categories, or "student intent," is the student's declared purpose for attending college. Student intent categories are displayed on the opposite table.

Student intent categories are determined during the admission process and updated or clarified during each quarter's registration. Ideally, selection of an enrollment category would be the end result of an interview (or some variation) with

### STUDENT INTENT CATEGORIES

(1) General Studies (Degree or Certificate): The student is or appears to be enrolled primarily for the purpose of completing a certificate or up to two years of study which may qualify for an associate degree, but without either a specific occupational or college-transfer objective.

(2) Academic Transfer: The student is or appears to be enrolled primarily with the intent of transferring earned credits for advanced study in upper division programs of four-year institutions.

(3) Adult Basic Education: Enrolled primarily for the purpose of completing an 8th-grade education.

(4) High School Diploma/GED Certificate: Enrolled primarily for the purpose of completing a high school diploma or General Education Development certificate, either through the community college or some cooperating secondary school.

(5) Developmental: Enrolled primarily for the purpose of attaining or reviewing basic skills of a remedial nature.

(6) Occupational Preparatory: Officially enrolled in an approved vocational program intended to provide entry-level occupational skills.

(7) Occupational Preparatory, Applicant: The student has or appears to have the intent of enrolling in an approved occupational program, but is not officially recognized by the institution as being admitted to the program.

(8) Occupational Apprentice: The student is officially enrolled in occupational apprentice program courses that supplement or are related to regular work experience received on-the-job, and is registered with the Washington State Apprenticeship and Training Council and/or the Federal Bureau of Apprenticeship Training.

(9) Occupational Supplemental: The student is or appears to be enrolled primarily to augment existing job skills.

(10) Occupational Home and Family Life: Enrolled primarily to augment home or family-life skills.

(11) General Studies (Non-Degree/Non-Certificate): The student is or appears to be enrolled for "personal enrichment" or to explore educational opportunities.

(12) Undecided: The student has specifically stated that he cannot declare a specific objective or long-range goal associated with his enrollment at the time, and none of the above categories apply.

(13) Other/Not Indicated: The student did not select a category, and the institution did not assign one.

each student. This is not possible in every case, and when it is not, the institution uses its best judgment on how to assign a category. Student intent data is the best estimate of enrollments at the time data is produced.

The source of students entering the community college system is frequently used by the Council for Postsecondary Education in its report on student mobility among the various elements of education. It is also used in the planning and budgeting process. Student source categories are classified into six areas, as shown in the opposite table.

Student credit hour loads are discussed on page 55. Part-time students are defined for fee collection purposes as those enrolled for less than 10 credit hours per quarter; full-time students are defined as taking 10 or more credits.

## SOURCE CATEGORIES

(1) Transfers: All students who are transferring college-level credits from some other institution and who were registered for one credit the previous fall term at some other institution. This category has been further defined to gather data on those students entering the community college system from four-year public and private universities, out-of-state colleges and universities, and intra-segment transfers.

(2) Retained: Students who were enrolled in the same institution the previous fall term.

(3) Military: Students who were in the military service during the previous academic year.

(4) High School: Students who graduated from a high school in the State of Washington during the preceding academic year. The county of high school previously attended is collected.

(5) Out-of-State: Students whose residence during the previous fall quarter was outside the State of Washington, and who were not registered for credit at any institution of higher education outside the State of Washington.

(6) All Others: Students not elsewhere classified and located in the State of Washington during the previous fall term, e.g., housewives, those previously employed, and veterans.

NOTE: Student demographic data is collected during fall quarter only and covers academic and occupational students (community service students are excluded). Numbers in italics represent percent of total within each category.

# STUDENT HEADCOUNT BY AGE

## WASHINGTON COMMUNITY COLLEGES
## FALL QUARTERS 1971 THRU 1977

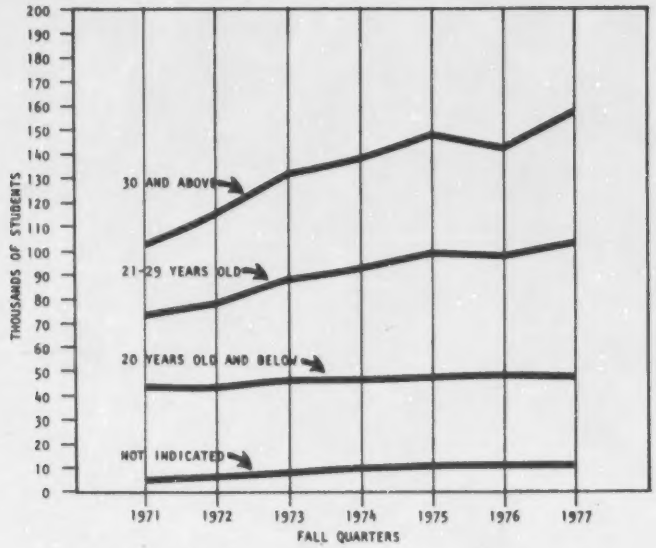
The average age of community colleges students is 29.

Currently 75% of all students indicating their age are 21 years or older; more than half of this same category are 30 years old or older.

Even though there was a percentage drop for those 20 years old and below between 1971 and 1977 (35.65% versus 23.32% respectively), the numerical decrease was only 50, indicating a leveling in this area.

A comparison between student age categories and student intent categories (Ref. table 2B1.2) indicates that the majority of students 21 years old and younger are attending community colleges for the purpose of academic transfer. Students between the ages of 22 and 25 are heavily clustered in the occupational preparatory category; the majority of students between the ages of 30 and 59 are attending for occupational supplemental purposes.

Table 2B1.1 on the following page displays age distributions for each college. Table 2B1.2 on page 39 displays age by student intent categories.



| DATA ELEMENT | FALL QUARTER 1971 | 1972 | 1973 | 1974 | 1975 | 1976 | 1977 |

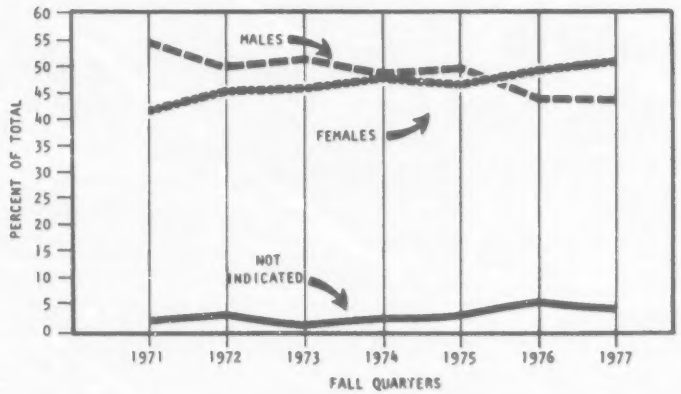
# STUDENT HEADCOUNT BY SEX

## WASHINGTON COMMUNITY COLLEGES
## FALL QUARTERS 1971 THRU 1977

As shown in the opposite graph and table below, female enrollment now exceeds male enrollment. In 1971, female enrollment accounted for 43% of the student population. In 1977, female enrollment exceeded that of males by nearly 7 percent (female 51%, male 45%). The declining veteran enrollment during 1976 and 1977 contributed to the decline of male enrollment.

When a comparison was made between the age and sex of students, it was found that between the ages of 19 and 25, men accounted for more than 50% of each age category. In the 18 and younger and 26 and over categories, women outnumbered the men. The decline in veteran enrollment probably accounts for these variations.

Table 2B2.1 on the following page displays the sex distribution for each college. Table 2B2.2 on page 42 displays sex categories by student intent.



| DATA ELEMENT | FALL QUARTER 1971 | 1972 | 1973 | 1974 | 1975 | 1976 | 1977 |

# STUDENT HEADCOUNT BY SOURCE

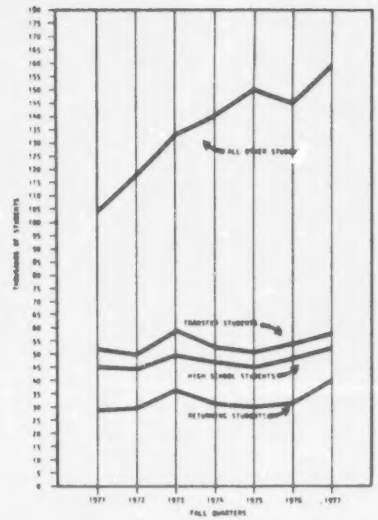
## WASHINGTON COMMUNITY COLLEGES
## FALL QUARTERS 1971 THRU 1977

Prior to Fall Quarter 1977, source data was gathered by asking students where they were the previous fall quarter. This information (the date in which a student last attended high school or an institution of higher education) is now captured directly from the admission records and is considered more reliable.

The greatest percentage (64%) of students entering community colleges fall under the category of "all others." Washington residents other than those entering directly from high school or immediately transferring from another Washington institution are counted in this category. Since this is the area in which veterans are classified, this category suffered the greatest decline between 1975 and 1976 (93,105 students to 85,433, respectively).

Entrants from Washington high schools decreased between 1976 and 1977. This was particularly evident in King County, perhaps because the University of Washington accepted more freshman in fall 1977 than had been the case in recent years.

Table 2B3.1 on the following page displays student source by college. Table 2B3.2 displays student source by student intent categories.



| DATA ELEMENT | FALL QUARTERS 1971 | 1972 | 1973 | 1974* | 1975* | 1976 | 1977 |

NOTE: Numbers in italics indicate percent of total; 8th Day Plus Adds Counting Methodology, 1971-75; Rolling 10th Day Counting Methodology, 1976-77. Student source is based upon student activity during previous Academic Year.

*Figures vary from previous publications due to file corrections.

1 Student was enrolled in another institution of higher education during previous Fall Quarter.

2 Includes homemakers, students previously employed, attending vocational-technical institutes and those not meeting other categories, 1971-76; in 1977, those from the military and out-of-state also included in "All Other" category.

3 Military and Out-of-State categories discontinued.

# STUDENT HEADCOUNT BY ETHNIC BACKGROUND

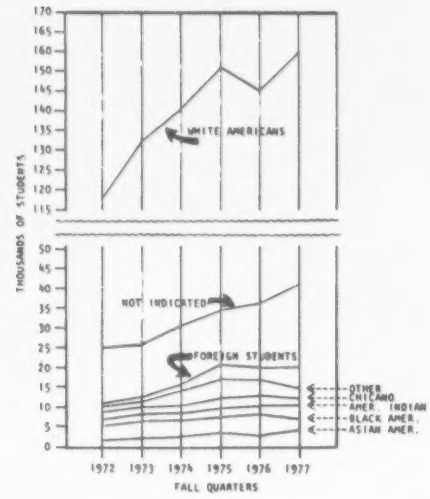
## WASHINGTON COMMUNITY COLLEGES
## FALL QUARTERS 1972 THRU 1977

The number of minority students attending community colleges is nearly 9% of the total student population. Compared to 1976, minority enrollment for Asians, Blacks, American Indians and Chicano/Mexican Americans has remained constant. The "other minority" category declined from 6,299 in 1976 to 2,645 in 1977. Refined data collection procedures account for most of the difference and also affected the accuracy of the foreign student data. Prior to 1977, not all foreign students (those with F or J Visas) were counted under this category. Rather, they were included under their individual minority classifications.

The greatest minority population is located in the Seattle area. Yakima Valley, Olympic, Tacoma and Fort Steilacoom Community Colleges also have relatively large minority enrollments.

Most minority students are enrolled in academic transfer, occupational preparatory and occupational supplemental areas.

Table 2B4.2 on page 48 displays ethnic background by student intent areas.



| DATA ELEMENT | FALL QUARTER 1972 | | 1973 | | 1974 | | 1975 | | 1976 | | 1977 | |

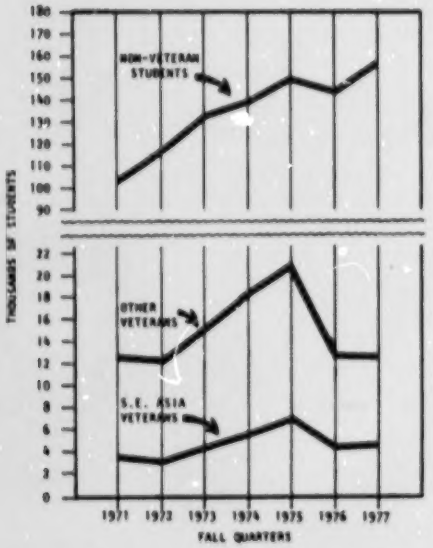
# STUDENT ENROLLMENT BY VETERANS STATUS

## WASHINGTON COMMUNITY COLLEGES
## FALL QUARTERS 1971 THRU 1977

The recent decline in veteran students attributable to new federal restrictions affecting G.I. Bill educational benefits is considered the greatest single factor affecting community college enrollments during the year 1976 and 1977.

The decline between 1975 and 1976 (7,752 students) is much greater than the decline between 1976 and 1977 (803 students). This difference is probably due to the one-time impact of the government's new delimitation policy.



| DATA ELEMENT | FALL QUARTER 1971 | 1972 | 1973 | 1974 | 1975 | 1976 | 1977 |

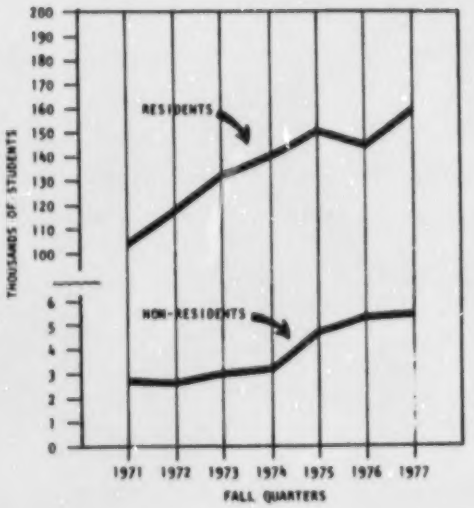
# STUDENT HEADCOUNT BY RESIDENCY STATUS

## WASHINGTON COMMUNITY COLLEGES
## FALL QUARTERS 1971 THRU 1977

The percent of non-resident students is relatively small (3.3% or 5,225 students in 1977). The non-resident student population consistently increased between 1971 and 1976, and showed only a minimal decrease (52 students) between 1976 and 1977.

Non-resident students are heavily clustered in the Seattle Central area, the Yakima Valley area, and colleges which are close to state borders--Walla Walla, Lower Columbia, Clark, and Spokane.

Non-resident students are primarily enrolled for purposes of academic transfer and occupational preparatory. Table 2B6.2 on page 54 displays this data.



| DATA ELEMENT | FALL QUARTER 1971 | 1972 | 1973 | 1974 | 1975 | 1976 | 1977 |

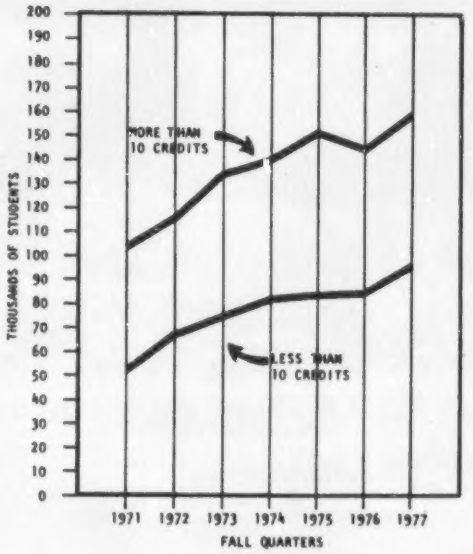
# STUDENT HEADCOUNT BY CREDIT HOUR LOAD

## WASHINGTON COMMUNITY COLLEGES
## FALL QUARTERS 1971 THRU 1977

Part-time students are defined for fee collection purposes as those enrolled for less than 10 credits. Full-time-equivalents are hypothetical students taking 15 credits per quarter (a full-time student typically takes 45 credits per academic year).

The number of part-time students rose to 62 percent of total enrollments during Fall Quarter 1977. The average credit-hour load dropped from 8.5 in 1976 to 8.1 in 1977. Since most veterans are full-time students, the decrease in their enrollments contributed to the decline.

The majority of part-time students are enrolled in the occupational supplemental and general studies (non-degree) areas. Full-time students are primarily enrolled in the occupational preparatory and academic transfer areas. Table 2B7.2 on page 57 displays student credit-hour loads by student intent categories.



| DATA ELEMENT | FALL QUARTER 1971 | 1972 | 1973 | 1974 | 1975 | 1976 | 1977 |

# STUDENT HEADCOUNT BY STUDENT INTENT

## WASHINGTON COMMUNITY COLLEGES
## FALL QUARTERS 1974 THRU 1977

The tables below and on the following page illustrate the composition of students, other than those enrolled in community service courses, on the basis of their educational objectives--the student's intent for attending a community college (refer to Addendum B, A Description of the Community College Management Information System, for definitions of student intent categories). Table 2B8.1 on the following page, displays system data by student intent categories for headcount and FTE enrollments, average credit-hour loads, the percentage of headcount enrollment attending day-on-campus courses, percent males, average age, percent minority, and percent of veterans.

The greatest percentage increase between 1974 and 1977 was in the area of General Studies (Non-Degree/Non-Certificate)--from 12.23% of total in 1974 to 17.81% in 1977. Occupational preparatory students represent the largest share of both headcount and FTE enrollments and generate the most credit hours (more than 1/3 of total). Males dominate enrollments in the apprentice category only; females, however, constitute the majority system-wide. Veterans are heavily clustered in the general studies (degree/certificate), academic transfer, and occupational preparatory fields. The highest average age is in the general studies (non-degree/non-certificate) area which is offered predominantly during evening hours.

# STUDENT HEADCOUNT BY TIME/LOCATION

## ACADEMIC AND OCCUPATIONAL STUDENTS ONLY
## WASHINGTON COMMUNITY COLLEGES
## FALL QUARTER 1974-77

The number of students attending day-on-campus courses compared to all other times and locations (evening on-campus, day and evening off-campus) is displayed in the table below.

Day-on-campus activity is the primary workload indicator that is used in the Capital Analysis Model (CAM) process to generate space allowances and is also a good indicator of the enrollment demand for full-time faculty.

Currently, 41% of total academic and occupational students attend day-on-campus courses. In 1974, nearly 44% attended during the day and on-campus.
